PROFESSIONAL EXPERIENCE

Logpoint

February 2022 - August 2024

Software Engineer

- Worked as a Feature Lead in collaboration with the product and project team by assisting in clarification and finalization of the requirements and high-level estimates, ticket creation, and overall timeline of product delivery, for the migration of Alert Creation microfrontend which allows users to generate alerts based on their desired configuration.
- Migrated existing UEBA (User and Entity Behavior Analytics) module from EXTJS to a separate React micro-frontend for the display of anomalous behavior of entities using various charts, tables, and lists.
- Refactored Logpoint's front-end codebase to facilitate seamless rebranding of Logpoint for a new company in collaboration with the product owner to gather requirements and project management to establish delivery timelines.
- Data visualization of SOC Manager Dashboard for incidents and cases generated and their various categorizations.
- Reusable component-driven development using storybook and writing test cases using Jest and react testing library.
- Involved in discussions related to the product's features and technical feasibility before getting a project assigned

Waft Technology Pvt. Ltd

August 2021 - January 2022

FrontEnd Developer

- Worked in close collaboration with a fully remote team to integrate new features into an existing e-learning web app.
- Built a Chrome extension of an existing web app where users could simply log in and resume their learning journey without having to go into the web app itself.
- Worked on an existing web app for better user experience on mobile devices.

- Segregated existing code into reusable components and functions.

Zegal Nepal Pvt. Ltd
FrontEnd Developer

January 2020 - August 2021

- Implemented zchat feature in ZegalSign that allows users to do real-time interaction during document creation using web sockets.
- Implemented new features to support the usage of ZegalSign for Google Drive documents.
- Took part in the design process and assisted in implementing a feasible technical feature for document creation and signing workflow in ZegalSign.
- Worked as a front-end Developer in collaboration with other team members for feature enhancement using React, MobX, Jest, and react-testing library alongside debugging and troubleshooting application code.

Inspiring Lab Pvt. Ltd
